

ShieldiT Enterprise for MSSPs & MSPs

Multi-Tenant Secure Communications and Mobile
Threat Defense for Managed Service Providers

Executive Summary

Managed Service Providers (MSPs) and Managed Security Service Providers (MSSPs) face growing demand for **turnkey cybersecurity solutions** that safeguard both **mobile endpoints and communications channels**.

ShieldiT Enterprise by ASPIS Cyber is an **all-in-one, white-labeled platform** that empowers MSPs and MSSPs to deliver secure communications and **mobile threat defense (MTD)** under their own brand. The platform features **full multi-tenant management, enterprise-grade encryption**, and **flexible deployment models** to fit any client environment.

With ShieldiT Enterprise, partners can rapidly expand service portfolios to include **AI-powered mobile security, end-to-end encrypted voice, video, and messaging**, and **compliance-aligned oversight**, all delivered through a **scalable SaaS architecture** with optional **private cloud** or **dedicated infrastructure** for high-security clients.

Key Use Cases for MSP/MSSP Partners

White-Labeled Mobile Security Services

Deliver fully branded secure communications and MTD solutions to corporate, government, and high-risk clients.

Multi-Tenant Threat Management

Centrally oversee device security, policy enforcement, and compliance for multiple customers from a single console.

Recurring Revenue Expansion

Create predictable revenue streams through PSTN calling, dedicated infrastructure, and secure device leasing.

Managed Communications Security

Provide end-to-end encrypted voice, video, and messaging as part of a complete managed security bundle.

Compliance-Driven Service Packages

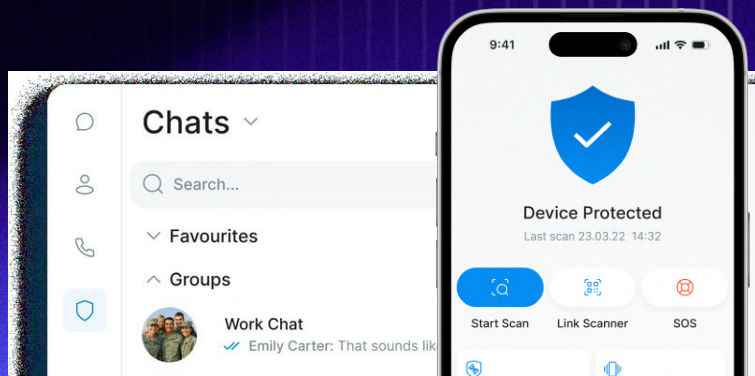

Help clients meet ISO 27001, SOC 2 Type II, and industry-specific compliance requirements.

Client Retention via Differentiation

Stand out from competitors by offering unified mobile security and communications rather than basic MDM alone.

Core Feature Tailored for MSP/MSSP Success

Multi-Tenant Architecture

Manage multiple clients in isolated tenant environments with delegated administrator roles for security and control.

Full White-Labeling

Customize branding, domains, and notifications to align with partner identity and customer expectations.

Encrypted Communications

End-to-end encrypted voice, video, and chat using AES-256 with Olm/Megolm protocols and Double Ratchet key management for forward and backward secrecy.

On-Device Mobile Threat Defense

AI-powered detection of phishing, rogue networks, device compromise, and malicious apps without reliance on cloud analysis.

Core Features Tailored for MSP/MSSP Success

ManageiT Admin Console

Unified interface for threat management, device oversight, and customer-specific policy enforcement.

AuditBot Compliance Logging

Automated capture and export of communications and events for ISO 27001, SOC 2 Type II, and industry audits.

Flexible Integrations

Works seamlessly with Active Directory, Azure AD, Okta, Intune, major SIEMs (Sentinel, Splunk), and compliance platforms (Smash, Purview).

Scalable Deployment Models

SaaS-first approach with options for dedicated clusters, private cloud, or on-premise hosting for high-security clients.

Why ShieldiT Enterprise for MSP/MSSP Partners?

01

Accelerated Time to Market

Launch fully branded secure mobile services quickly without the need for heavy development investments.

02

Recurring Revenue Model

Create predictable, high-margin recurring revenue streams through SaaS and managed service offerings.

03

Differentiated Security Stack

Offer a unified communications and mobile threat defense platform, rather than basic device management alone.

04

Operational Efficiency

Centrally manage all clients with tenant isolation, role-based access controls, and cross-tenant visibility.

05

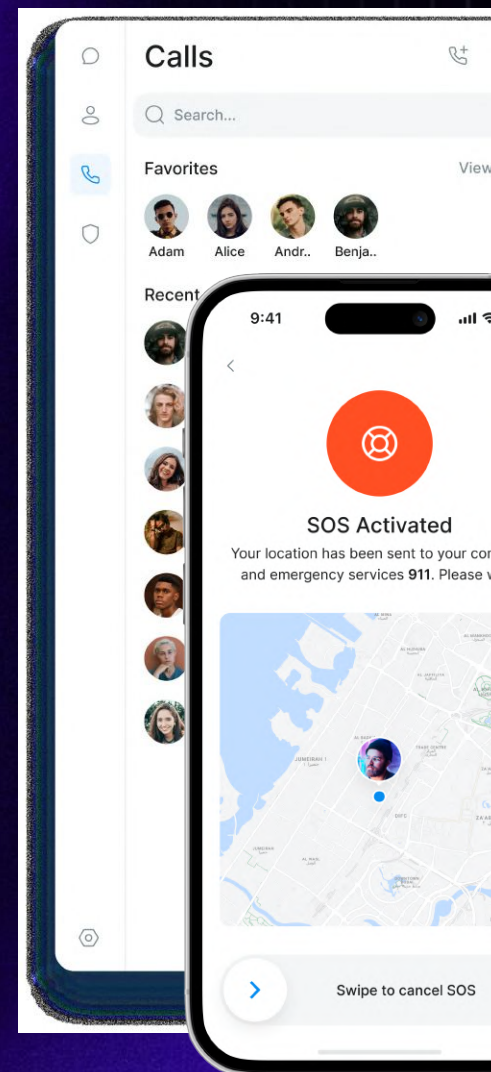

Compliance and Privacy First

Designed for clients requiring ISO 27001, SOC 2 Type II, and other regulated industry standards.

06

Proven Enterprise and Government Deployments

Trusted in high-security environments worldwide, ensuring reliability and credibility for your services.
